

# Sensor Selection Guide

## Sensors ::: Optical Fiber Sensors

### Optical Fiber Amplifier

**Standard**

**Analogue output amplifier**

**Dual amplifier 2-in-1**

**Advanced teaching amplifier**

Highest speed detection

Object size and position control

Parts discrimination

Detection of miniature objects

Dust and dirt compensation

Dynamic teaching during production

Color mark detection, Miniature object detection

Color mark detection, Liquid detection

LED bar graph

Dual display and bar graph

Dual display and bar graph

Dual display and bar graph

Dual display and bar graph

Dual display and bar graph

Dual display and bar graph

Single display and bar graph

Manual adjustment with potentiometer
